SUMMARY

Data Analyst and MS Business Analytics student (GPA 3.78) with 4+ years of experience building analytics pipelines, dashboards, and ML-powered systems. Currently supporting academic leadership at Temple University with Tableau dashboards and data reporting. Proven ability to go from raw data to deployed, production-ready analytical systems. Targeting Data Analyst, Business Analyst, and BI Analyst roles.

SKILLS

Analytics & Visualization: Tableau, Power BI, Excel (Pivot Tables, Advanced Formulas), Google BigQuery

Databases & Data Engineering: SQL (PostgreSQL, BigQuery), ETL pipelines, Star Schema design, Data Validation

Machine Learning & Statistics: scikit-learn, Random Forest, Logistic Regression, KNN, Clustering, PCA, Time-Series, SHAP

Programming: Python (Pandas, NumPy, scikit-learn), R, SQL, FastAPI, Django

AI & NLP: LLMs, RAG pipelines, NLP, Elasticsearch, Rasa

Tools & Platforms: Git, Docker, Microsoft 365 (Power BI, PowerApps, SharePoint), JIRA

EXPERIENCE

Data Analyst | CEHD, Temple University 2025 – Present | Philadelphia, PA

- Build interactive Tableau dashboards for academic leadership tracking enrollment trends, graduation rates, and student lifecycle milestones, used in live semester reporting to the Assistant Dean
- Perform data validation, cleaning, and EDA to ensure accuracy across academic and operational datasets
- Develop structured reporting documentation and support data-driven decision making for university administration
- Collaborate with university staff to translate reporting requirements into actionable analytics deliverables

Software Engineer | Sinergia Media Labs 2021 – 2025 | Kerala, India

- Designed and delivered analytics dashboards with interactive visualizations for clients across Ecommerce, SaaS, Healthcare, EdTech, and Media using SQL and Python
- Built automated ETL pipelines to extract, clean, and structure large datasets for production analytics workflows
- Developed AI chatbots and NLP pipelines integrating LLMs, Rasa, and Elasticsearch serving real client deployments
- Designed and maintained database schemas and backend data systems supporting operational reporting and business intelligence
- Collaborated with stakeholders to translate business requirements into technical data specifications and reporting artifacts

PROJECTS

Tableau Portfolio: [Tableau Portfolio](#)

Student Enrollment Intelligence System - Python, PostgreSQL, ML, SHAP, FastAPI, Power BI, Groq AI | [Live API](#) | [GitHub](#)

- Built end-to-end pipeline ingesting 4,424 student records into PostgreSQL star schema; trained Random Forest (90% accuracy, ROC-AUC 0.95) with SHAP explainability and Logistic Regression baseline
- Deployed live FastAPI on Render with AI-powered /ask endpoint (Groq LLM) explaining student dropout risk in plain English; built 6-visual Power BI dashboard covering KPIs and ML insights

Chatbot Conversation Cost & Success Prediction - Python, KNN, Logistic Regression, scikit-learn

- Built KNN regression to predict chatbot cost using early interaction signals; classification models (LR, LDA, QDA) to predict conversation success evaluated with ROC-AUC and precision-recall

Global Homicide Rate Analysis & Forecasting - Python, Clustering, Regression, Time-Series

- End-to-end ML pipeline using clustering, classification, regression, and time-series forecasting to analyze and predict global homicide trends across countries

EDUCATION

MS Business Analytics | GPA 3.78 | Fox School of Business, Temple University 2025 - Dec 2026 | Philadelphia, PA

Statistical Learning, Decision Models, Supervised/Unsupervised Learning, Time-Series Forecasting, Optimization, Monte Carlo Simulation

B.Tech, Electronics & Communication Engineering | College of Engineering, Chengannur 2017 - 2021 | Kerala, India

CERTIFICATIONS

Google Certified Business Intelligence Professional
